

Kinnarps

scala

scala

Scala is a lightweight yet robust standard chair available in a number of different finishes. In its four-legged version, Scala is stackable, and with a five-star base and castors the chair's sitting height is adjustable (gas spring). It comes with or without armrests. Scala is available entirely in wood, with upholstered back and seat or with only the seat upholstered. The chair can also be fitted with a bracket for hanging on a table. Also note the characteristic hole in the backrest, very handy when moving the chair.
