solo

# solo

As the name suggests, Solo is an armchair which shows itself off to advantage in all settings - as a standalone chair or as an independent unit in a larger group. Solo is good value, combining comfort with modern design. The chair comes in four variants – four-legged or with an underframe, and with or without armrests. In its four-legged version, Solo is stackable, and with armrests, it can be fitted with castors. The Solo family also includes a desk chair.
