

# S E R I E S [ E ]

# SERIES[E]

*Series[e] is more than a storage unit. It began as a thought based on a need, and in its final form, it has many different guises. The possibilities are endless. It is your decision. Storage units, meeting points, seating furniture, sound absorbers, or room dividers. Combination is its strength. Between flexibility and modularity, between design and function.*

## **A WORLD OF OPPORTUNITIES**

Series[e] is a multifunctional storage unit that can be used in many different ways; for spontaneous meetings, as seating furniture, room dividers or sound absorbers. The series' modular design, combined with a choice of materials and finishes, enables it to be easily customised for both different work environments and personalised solutions. You select both an exterior and interior finish, and get an organised and functional storage unit and, at the same time, a well-designed and practical piece of furniture. Its top quality and classical, stylish design makes it both durable and easy to combine with the other furniture in the room. As it is flexible and easy to adapt, it fits in extremely well with the Next Office – Activity-Based Working concept.

**YOU DECIDE**

Series[e] is a complete series of storage units which builds on the basic units in different sizes and models. You can combine and supplement these, both in height and width. You then choose which front, underframe or insert goes best with the units. Choose between different types of surfaces, and between tambours, doors, open shelves, sliding and glass doors or drawers. You can also choose between bases, legs or a mobile underframes. The modules can be internally customised to create a personal storage unit. You can combine them with our sound-absorbing backs and screens if you need to minimise noise levels.

**READY FOR CHANGE**

Individual, environmental and situational needs can be different today from what they were only last week, and what they will be in six months' time. Series[e] can therefore be scaled up or down, both internally and externally according to your needs. All inner sides of the furniture have the same pattern of holes to provide as much flexibility as possible if you wish to change the interior design or the front. If you choose a mobile base, it is easy to move the storage unit if you need to.

## PEDESTALS, MOBILE STORAGE UNITS & POC

### PERSONAL STORAGE UNIT- 2PM400TAD/2PMT400TAD MOBILE

This is a special unit for personal storage. It has space for two vertical binders, is supplied with a drawer and a tambour, as well as a binder shelf, pull handle, letter slot, clothes hook, name tag holder and four castors (two of which are lockable). As an optional extra, the top can be designed with rounded corners and an extendable filing system insert.

### PEDESTAL

With a pedestal, you get a flexible and personal storage unit which is always close to hand. You can complete this with a choice of designs to fit your needs.

POC L 800

POC L 900

POC H 800

POC H 900

POC H W

POC H DUO

### POC

POC (Pull Out Cabinet) can be used as a personal storage unit or as a storage unit that can be shared by two people (Duo). POC is available in two heights: 740 mm which is table height and 1,246 mm (3P) which has space for 3 rows of A4 binders. The table-high model offers extra loading space beside the desk. Pull out the taller 3P POC to segregate your own space in an open-plan office.

## FUNCTIONS &amp; OPTIONS

**MOBILE UNDERFRAMES**

The MO underframe has lockable castors and is designed to align in height with the LSA and LS stationary cabinets.

**PERSONAL STORAGE UNITS**

It is important to be able to relax and know that your personal belongings are stored safely. We are therefore offering lockable units. You can choose between the following locks: standard lock, locking handle for padlocks (padlock not included) or coded lock.

**SCHOOL STORAGE**

Series[e] offers flexible and functional storage units for school environments. Both staff rooms and classrooms have many things which need to be stored in an organised and orderly fashion. There are many different alternatives to choose between.

**FLEXIBLE STORAGE UNIT**

Series[e] is a great choice if you require a flexible and extendable storage unit that helps you in your day-to-day work. The series is not only about storage – by adding a seat cushion to the pedestal, you get an extra seating space, for example.

**TOP IN TABLE HEIGHT**

The tops of the pedestals can be adjusted between 686 and 766 mm to fit under the height of the table.

**INSERTS FOR PEDESTALS**

Our pedestals can be fitted-out in several different ways. The lower drawers can be fitted with pen trays and form compartments, while the upper drawers can be fitted with full- and half-format filing baskets, and with binder baskets.

## FUNCTIONS & OPTIONS

### **VENEERED BACK**

With a double-sided veneered back, the storage furniture offers an attractive design both internally and externally. The veneered back is available in beech, birch and oak. You can combine a veneered back with our veneered storage units or with storage units with a Lamine finish: white, light grey and dark grey.

### **BACKSTOPS AND FILE-FOLDER BOOKENDS**

The open shelves can be supplemented with extra shelves, backstops and file-folder bookends for optimal functionality. In addition, there are also a number of design options to choose from, for example A4 cassettes and extendable plastic crates.

### **REAR PANEL**

The smart rear panel makes it easy to put a personal touch on or rejuvenate the rear of the cabinet. The rear panels are available in different finishes (Lamine, cork, grey lacquer or upholstered in fabric). Tip: A cork panel functions very well as a notice board.

### **LANDSCAPE OR PORTRAIT**

Series[e] is available as a horizontal (L as in landscape) and standing (P as in portrait) document storage unit. Regardless of which you choose, very little space is wasted. Both storage alternatives are also fully compatible and can be combined with each other.

### **FILING STORAGE - FF**

Folders allow for an organised and clear storage unit. Series[e] has the latest version of the filing system with a frame. The filing frame is available fitted in behind the doors or tambours as well as with a drawer front.

### **EXTENDABLE SLIDING RUNNERS WITH ACCESSORIES**

Extendable sliding runners for binder and filing baskets and aids such as pen trays, form compartments and CD racks, make it easy to design an interior based on your needs.

#### LATERAL SHELVES

The lateral shelf in powder-coated metal is available in 800, 1,000 and 1,200 mm widths. The shelf also works very well with lateral files which hang under the shelf.

#### QUIET AND ENVIRONMENTALLY FRIENDLY STORAGE BOX - FD

The FD Re:fill drawer offers you a discrete storage unit solution. The drawer is A4 sized, soft and quiet in contact with other materials, which minimises unwanted noise. The soft material also means that the drawer does not scratch easily. The drawer is made of Re:fill, a material which has a minimal impact on the environment as it contains 40% recycled fabric, 40% melted fibres and 20% PET.

#### LEGS, CASTORS OR BASE

A plastic (BA) or metal (BAM) base makes the floor easier to clean, and an underframe gives the cabinet a significantly more spacious look. Our new metal base is available in the same colours as our table legs – white and silver. If you wish to be able to move your storage furniture, a mobile base is also available.

**VERTICAL TAMBOUR - TA**

The vertical tambour is fitted with a tambour brake to prevent injuries from pinching. The tambour is available in wood or plastic and the colour of the handle blends well with the tambour as a whole. The storage unit is supplied with a lock.

**EXTERNAL DOORS - DO**

This front with exterior doors has an opening angle of a full 270°. The angle provides maximum flexibility when you are selecting an interior design. Note that right-hung doors are standard on fronts fitted with single doors. Therefore, it is important to state if you would like a left-hung door when ordering.

**FILING DRAWER - FF**

The FF filing drawer is designed for A4 suspension files. FF has a number of smart functions such as extendable sliding runners, anti-tilt and self-retraction. This filing drawer is of course supplied with a lock.

**HORIZONTAL TAMBOUR WITH LOCK - TAH**

This horizontal and lock-fitted tambour is available in wood or plastic, and handle colours blend well with the tambour as a whole.

**SLIDING DOORS WITH LOCK - SDI**

The sliding door panels are supplied with a lock and run in a hidden aluminium track. Your choice of handles.

**DRAWER MODULE**

The new 800 mm drawer module offers greater storage opportunities and flexibility. You can use it as a base drawer or place it directly on the desired underframe or base. You can choose between Lamine or veneer, and there is a choice of handles.

## HANDLES

### HANDZ

Lacquered plastic recessed handle. Available in silver, black or white. Other colour options available if you choose a customised handle. HANDZ can be used on our sliding doors.

### HAND 1

This stylish handle is made of plastic with a silver grey metal finish and has a 128 mm hole distance.

### HAND 2

This sober handle is made with silver grey metal and has a 128 mm hole distance.

### HAND 3

The handle has a 128 mm hole distance and has a silver grey metal and black plastic finish.

### PLUSHAND

This robust dark grey plastic handle has a 128 mm hole distance.

### HAND E

These sturdy handles are made from dark grey plastic. Note that they cannot be used on glass doors.

## CARCASSES/MODULES

You have many options to choose from here. You can choose between different breadths, heights and depths. All modules can be ordered with our different types of finishes, all so that you can get the look that best fits in with the environment and interior design. You can choose between Lamine in white, light grey, dark grey, oak, beech or birch, or veneers in

oak, beech or birch. You can also choose different types of front which have different designs and functions. Tambour, both vertical (400-800 mm wide) and horizontal (1000-1200 mm wide), sliding doors which save space, or doors with a large opening angle. All doors can be easily combined with different handles or locks.
